1 Introduction

1.1 Scope

This document describes how to reduce TEMPLATE data with the `edps-gui` dashboard (Graphic User Interface), the recommended infrastructure to reduce data from the ESO telescope, using the ESO Data Processing System (EDPS). Details on the TEMPLATE data reduction stream and how to configure the reduction to meet specific scientific needs are also given.

For a more extensive documentation on the `edps-gui` itself, consult the dedicated manual xxx

For a brief description of EDPS and its main concepts, see xxx.

For a detailed documentation on the TEMPLATE pipeline itself, consult the pipeline manual available at [here](#).
